

Arens Mini and Midi Operators with Chainhead

The Arens Mini and Midi Operators are light duty operators capable of opening single sashes. Ideal for operating windows in domestic settings as they are unobtrusive and easy to install. Mechanically, they both perform the same function, but the elongated cover on the Midi hides the run off tube that comes from the bottom of the Mini operator.

The Midi and Mini provide an alternative to the MDCR when looking for a manual operator ideal for a domestic installation. Installed with tubing running up to a chainhead mounted on the sill.

Arens Mini Operator with Chainhead

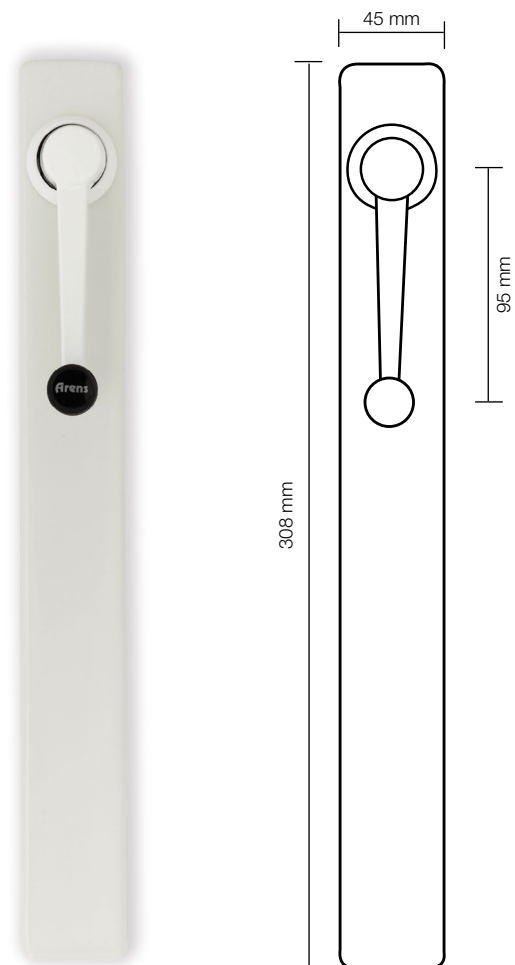

- A light duty operator used on single sashes
- Ideal for domestic use
- The operator can be adapted to open sliding sashes
- Unobtrusive and simple to install
- Finished in white (Black and grey available on special indent)
- There will be some run off tube coming from the bottom of the mini operator as illustrated in the typical application diagram.

Mini

Arens Midi Operator with Chainhead

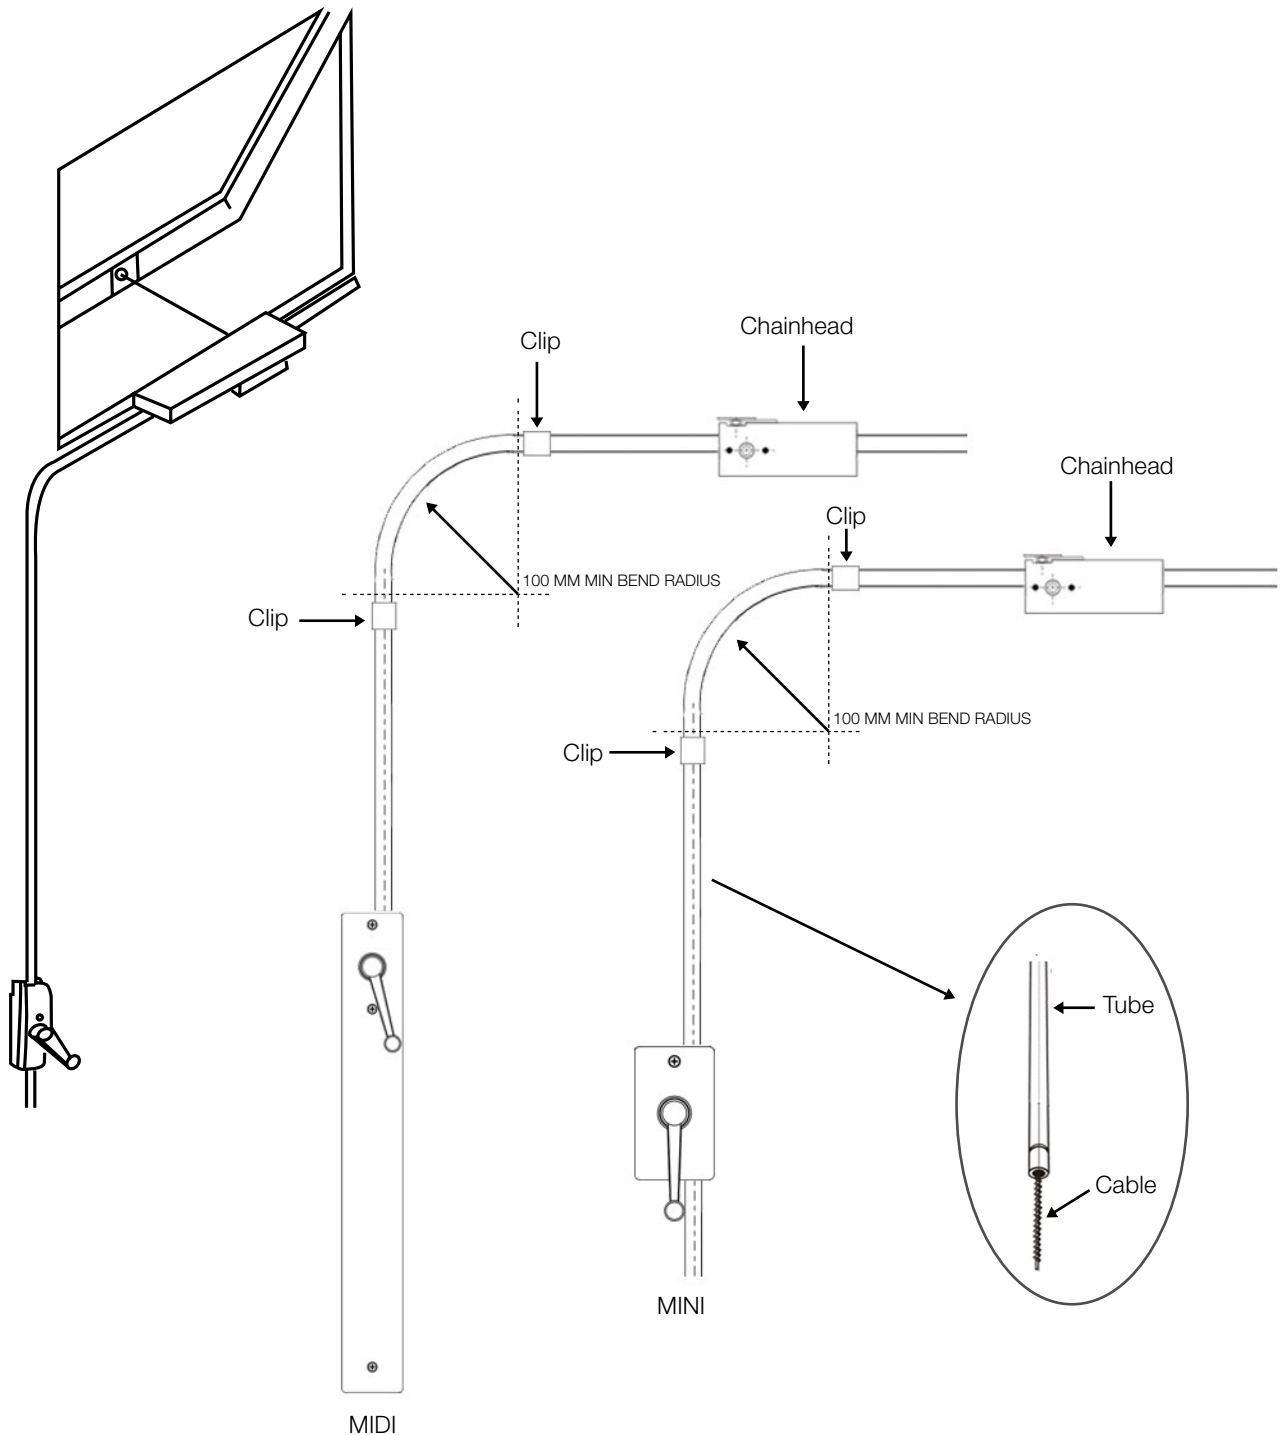

- The Midi operator is mechanically the same as the Mini operator
- The elongated cover hides the run off tube.
- Finished in white (Black and grey available on special indent)
